

EZ Dine Point of Sale System

EZ Software Solutions offers powerful options designed to fit your hospitality needs with our EZ Dine suite of products. With EZ Dine you can expect an increase in sales, a reduction in employee errors, eliminate inaccurate time cards and employee theft. Our suite of products will improve your bottom line. EZ Dine is truly the easiest Point of Sale program to use, with most servers learning the system in less than an hour.

Future of Restaurant Management

EZ Dine POS is a complete management solution designed to streamline restaurant operations. EZ Dine will enable a faster kitchen response; help prevent order mistakes, employee errors, missing inventory, inaccurate time cards, and employee theft. In addition, the system supports gift certificate, gift cards and loyalty programs designed to increase sales.

Designed with EASE in Mind

Our number one client comment about EZ Dine is how easy the software is for their servers to learn and use. Most clients report an average learning time of less than an hour. EZ Dine has all the impressive features you've seen on more expensive systems, but at a fraction of the cost. With EZ Dine POS you don't pay more, you just get more!
