

Let EZ Retail help you level the playing field in today's competitive market!

EZ Retail Point of Sale System

EZ Retail is the latest in POS and Inventory Management technology for single, or multi-store retailers. EZ Retail POS is designed for retail businesses that need an application that is affordable, easy to learn and use, with functionality that can eliminate manual processes and increase efficiency.

Future of Retail Management

EZ Retail POS provides a complete solution to automate your store, customer database and loyalty programs, special offers and gift registry. Process transactions quickly with bar code scanning and an easy-to-use touch screen.

EZ Retail reporting makes it easy to view and interpret store information. For instance, analyze sales by customer, event, or employee.

Affordable

It has all the impressive features you've seen on more expensive systems, but at a fraction of the cost. With EZ Retail POS you don't pay more, you just get more!

All retail stores types can reap benefits and stay competitive using the EZ Retail system. We understand each retail store operates a bit differently and may need a custom feature to give them the edge. With EZ Retail you can benefit from a custom software package designed for you business needs.
